## SCANDOLA: FOR THE LOVE OF QUALITY

**Scandola** opened for business in 1976 in the Lessini Hills, on the outskirts of Verona, 1,100 metres above sea level. From its humble beginnings as a handcrafted furniture shop, the business continued to grow and expand, eventually seeing its products distributed nationwide. The secret of this success lies in a recipe based on simple yet effective ingredients: care for the product, people and the environment, teamed with a love of authentic materials. Together these elements enable **Scandola** to produce furniture that skilfully combines authenticity, superior craftsmanship and aesthetic perfection.

## 100% NATURAL FURNITURE WITH THE “MADE IN ITALY” TAG

Our collections are made using only solid spruce sourced from certified managed reforestation areas. The carefully chosen wood is dried at our facility and an entirely eco-sustainable production process does the rest: with no harmful waste and using water-based non-toxic varnishes, paints and glues, it not only keeps the wood's purity intact, but also protects the health of the environment, workers and customers.

## FROM PRODUCT TO SERVICES: ALL-ROUND QUALITY

In addition to high-quality materials and environmentally sustainable production, **Scandola** provides its clients with highly efficient service, which translates into hassle-free design, prompt delivery and the option of ordering custom made. Our aim is to foster a transparent business relationship built on trust and constant collaboration in interpreting market demands.

It is this pursuit of continuous improvement in our management processes that has culminated in our ISO 9001 certification.

## COLLECTIONS THAT PUT A NEW SPIN ON TRADITION: NUOVO MONDO

**Nuovo Mondo** offers a new classic style, a wonderful synthesis of elegance and contemporary flavour. It is a comprehensive line presenting a wide array of solutions for different areas of the home: from the kitchen to the bedroom, from the living room to the bathroom. Measured and refined, **Nuovo Mondo** aims to add a harmonious finishing touch to country houses as well as bring beauty and charm into city residences.

## COLLECTIONS THAT PUT A NEW SPIN ON TRADITION: TABIÀ

**Tabià** is a term given to the old barns found in the mountains and the collection that goes by this name evokes the very warmth and essence of these places. Lines are clean and solid, the compositions well balanced and bold. While solid spruce is still very much the main attraction, the pieces, though retaining their solid, reassuring character, have a clean and contemporary look that envelops the whole home, from the kitchen to the bedroom, from the living room to the study.

## **CONTRACT COLLECTION** **SCANDOLA HOTEL**

An ad hoc line for hotel rooms. Anyone choosing this line is rewarded with 100% natural furniture providing comfort and exuding charm. An extensive range of beds, bedside tables, storage units, étagères and wall panelling provides everything you need to give any type of guest room a bespoke fit-out marked by style and painstaking attention to detail. The company has set up a special internal division specifically to look after the contract market. This division handles projects from the initial brief through every stage of the manufacturing process all the way through to installation.
